

Motivation letter for the position as Main Chair in the Audit Board of ESN Germany

Dear Network,

My name is Patrick Peeck and I am a member of ESN Darmstadt. My first contact with ESN was during my semester abroad in Finland, where the local section organised a large part of the leisure activities and thus enriched our experience abroad extremely. Back in Darmstadt I had to realise that there was no section at our university (yet) - but fortunately other students had noticed that as well and I joined them. Together we founded our association in September 2018 and started our journey to become an ESN Section. Since then, in my position as Vice-President, I have gained extensive insight into the work at the local level, which will most certainly help me to fulfil the position in the AB as well.

The reason why I am applying is that my mandate as VP in Darmstadt is coming to an end this semester. After my second term in the board of our beautiful section I will finish my studies later this year which means that I might not be able to stay in Darmstadt to be active at the local level. As I always (at least since I am active within ESN) wanted to look a bit further and serve our network at the national or international level I feel that this would be the perfect possibility to do so.

If you're interested in some information about myself: I am studying IEM (Industrial Engineering and Management) and received my bachelor's degree in Paderborn (NRW) in 2015 and eventually started my master's degree in Darmstadt in autumn 2016. I needed to take a year off because I really didn't feel like continuing my studies straight away. I used the time to go abroad and get to know many interesting people and countries. Why am I telling you this you ask? Well.. I feel like both my studies and the experiences I made abroad will help me to perform the tasks that might lie ahead of me as a possible Audit Board member to the best of my knowledge and abilities.

I would be very grateful if you would give me the possibility to do so.

Looking forward to meeting you oN Air.

Yours sincerely,

Patrick
